### Jobs Report:

## Revised March and Preliminary April Jobs Figures Released

Indianapolis, Ind. – Today the Indiana Department of Workforce Development released revised March and preliminary April 2005 payroll employment figures for the state.

Indiana's seasonally adjusted job figures revealed a revised March total of 2,966,600 jobs, while April preliminary figures indicated an increase of 2,000 jobs over the previous month.

Ron Stiver, Commissioner of the Department of Workforce Development, stated, "While we are pleased to see modest job growth, Indiana is still 45,000 jobs from its peak in May of 2000 whereas the nation as a whole continues to grow jobs at record levels. This provides further evidence that Governor Daniels' aggressive economic reform proposals, most of which passed in the recent legislative session, are a much needed remedy."

### Seasonally Adjusted Figures:

The nation's seasonally adjusted figures for April indicated the U.S. has surpassed its prior peak employment with the addition of 274,000 jobs over the previous month, and an increase of 2,170,000 from a year ago. Meanwhile, Indiana remains approximately 45,000 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to March revised data was 2,966,600, whereas April preliminary figures were 2,968,600.

### Non-Seasonally Adjusted Figures:

Indiana's April preliminary non-seasonally adjusted payroll estimates revealed 2,971,300 jobs for the state, yet Indiana is still down 75,000 jobs from its non-seasonally adjusted peak in May of 2000. Additionally, March's revised total reported 2,947,000 jobs.

### Non-Seasonally Adjusted Metropolitan Statistical Areas:

Analyzing preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for April, the Anderson reported the addition of 500 jobs for the month while Bloomington added 1,000. The Columbus MSA remained relatively unchanged while reporting an increase of 300 jobs from March's total and the Elkhart-Goshen area reported a similar growth total by reporting 400 additional jobs for April.

Evansville reported an increase of 2,000 jobs for the month and Fort Wayne posted an increase of 1,600 jobs since the month of March. Meanwhile, Gary reported a 2,400 job increase during April and Indianapolis saw the largest increase for the month with the addition of 6,000 jobs. Additionally Kokomo remained relatively unchanged and added 300 jobs for the month of April.

The Lafayette MSA posted an increase of 1,600 jobs over the previous month while the Michigan City MSA increased by 600 jobs for April. Muncie remained relatively unchanged and added 300 jobs for April, while the New Albany MSA added 400 jobs. Also, the South Bend MSA revealed the addition of 1,100 jobs over the previous month while Terre Haute added 500 for the month of April.

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 27 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12<sup>th</sup> of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates
